## Summary

---

I am currently pursuing my bachelor's of technology in IT from USICT, New Delhi. I have a good knowledge of programming languages such as C/C++, and also have a good grasp over Data Structures and Algorithm. I am well equipped with knowledge about web technologies and looking to channelize all my knowledge and skill into my productivity.

## Education

---

**University school of information communication and technology, New Delhi**      **Dec 2020 – Jul 2024**  
*Bachelors of technology in Information technology*      *GPA: 9.007*

**Sant gyaneshwar model school, New Delhi**      **2018 – 2019**  
*Intermediate, PCM*      *93.4%*

## Experience

---

**Summer intern - Utkrisht(USS ACM)**      **Aug 2022 – Sep 2022**  
*Web developer*      *Remote*

- Developed a youtube-clone called "watchly", using React Js and Rapid API
- It mimics the core functionalities of you-tube, including videos search and categorization.
- The website provides the special videos from different sections such as coding videos, React videos and next.js videos.

## Projects

---

**Taskify** | *React JS, HTML, CSS, JavaScript* | [Github](#)

- \* Taskify is a web app built using React hooks, to enlist the to-do tasks at a particular place.
- \* In addition to listing the tasks, it provides the feature to remove and update the tasks and marking it as a completed task.

**QuizHub** | *React JS, API, CSS JavaScript* | [Github](#)

- \* It is a web-app built using React JS, to conduct a 22 category quiz with three levels– easy/medium/hard. It provides a facility to the user to select the category and difficulty level to simulate the quiz.
- \* It fetches questions from API and with an interactive UI final score is displayed at the final page.

**FitMentor** | *React JS, Rapid API, CSS, JavaScript* | [Github](#)

- \* Browse through a variety of hundreds of exercises for the whole body.
- \* It fetches exercises and their demo from Rapid API and shows correct way of doing exercises with animated gif and youtube videos.

## Skills

---

**Core:** Data Structures, Algorithms, OOPS, DBMS, Operating system

**Languages:** C++, JavaScript, HTML, CSS

**Frameworks/Technologies:** React JS, Bootstrap, Tailwind CSS

**Developer Tools:** VS Code, Vercel, Netlify, Git, GitHub

**Database:** MySQL

## Achievements

---

- \* Solved 400+ questions and in the top **31%** on [Leetcode](#) and a maximum rating of **1546** worldwide.
- \* Solved more than 200 problems on [GFG](#)
- \* Contributed to open source community through Hacktoberfest, organized by Digital Ocean in October 2022.
